**The Interconnections between Victorian Writers, Artists and Places**

Tanabe, Kumiko (ed.)

(Cambridge Scholars)

2019 : 11 570 p. Hardback 9781527538252 £64.99

This volume deals with the various (direct and indirect) connections between literary figures, artists and locations during the Victorian era. It also addresses influential figures from before and after this period, such as William Blake, Sir Joshua Reynolds and Mother Teresa, as well as the connection between Britain and America in certain contexts. In establishing such relationships, this volume, therefore, covers a wide range of writers and painters, such as Charles Dickens, Arthur Conan Doyle, Thomas Hardy, William Morris, D. G. Rossetti, J. E. Millais, Herman Melville, J.M.W. Turner, G. M. Hopkins, William Butterfield, W. H. Ainsworth, and Sir Edward Coley Burne-Jones, while also including cultural topics related to both Victorian society and the eras which preceded it.

**Edith Wharton, Willa Cather, and the Place of Culture**

Olin-Ammentorp, Julie

(U. of Nebraska Pr.)

2019 : 10 396 p. Hardback 9781496203243 US\$60.00

The first comparative study of Edith Wharton and Willa Cather in thirty years, this book combines biographical, historical, and literary analyses with a focus on place and aesthetics to reveal Wharton's and Cather's parallel experiences of dislocation, their relationship to each other as writers, and the profound similarities in their theories of fiction. Julie Olin-Ammentorp provides a new assessment of the affinities between Wharton and Cather by exploring the importance of literary and geographic place in their lives and works, including the role of New York City, the American West, France, and travel. In doing so she reveals the two authors' shared concern about the culture of place and the place of culture in the United States.

**Flowering Tales: Women Exorcising History in Heian Japan**

Watanabe, Takeshi

*Harvard East Asian Monographs, 427* (Harvard U.P.)

2020 : 02 330 p. Hardback 9780674244405 US\$65.00

Telling stories: that sounds innocuous enough. But for the first chronicle in the Japanese vernacular, *A Tale of Flowering Fortunes* (*Eiga monogatari*), there was more to worry about than a good yarn. The health of the community was at stake. *Flowering Tales* is the first extensive literary study of this historical tale, which covers about 150 years of births, deaths, and happenings in late Heian society, a golden age of court literature in women's hands. Takeshi Watanabe contends that the blossoming of tales, marked by *The Tale of Genji*, inspired Eiga's new affective history: an exorcism of embittered spirits whose stories needed to be retold to ensure peace.

**Recent Scholarship on Japan: Classical to Contemporary. Unabridged ed**

Donovan, Richard (ed.)

(Cambridge Scholars)

2019 : 12 186 p. Hardback 9781527543256 £58.99

This anthology presents a survey of recent scholarship on Japanese literature - classical, postwar, and contemporary - and Japan studies from both established and up-and-coming academics based in the West and East. The first section of the book considers the Heian period and its literature from the perspective of female authors and their works. The second part explores postwar prose and poetry, as well as the writing of contemporary author Haruki Murakami, relating them all to issues present in Japan's wider society. Finally, the third section puts Japan and its writings within the global context, comparing them with other historical, cultural and linguistic milieus, and considering the role of translation in representing Japanese literature to the world.

Sarra, Edith

*Harvard East Asian Monographs, 429* (Harvard U.P.)

*The Tale of Genji* (ca. 1008), by noblewoman Murasaki Shikibu, is known for its sophisticated renderings of fictional characters' minds and its critical perspectives on the lives of the aristocracy of eleventh-century Japan. *Unreal Houses* radically rethinks the *Genji* by focusing on the figure of the house. Edith Sarra examines the narrative's fictionalized images of aristocratic mansions and its representation of the people who inhabit them, exploring how key characters in the *Genji* think about houses in both the architectural and genealogical sense of the word.

2020 : 02 240 p. Hardback 9781788927185 £109.95 Paperback 9781788927178 £34.95

This book sets out duoethnography as a method of research, reflective practice and as a pedagogical approach in English Language Teaching (ELT). The book provides an introduction to the history of duoethnography and lays out its theoretical foundations. The chapters then address duoethnography as a research method which can be used to explore critical and personal issues among ELT teachers, discuss how duoethnography as a reflective practice can aid teachers in understanding themselves, their colleagues or their context, and demonstrate how duoethnography can be used as a pedagogical tool in ELT classrooms. The chapters are a range of duoethnographies from established and emerging researchers and teachers, which explore the interplay between cultural discourses and life histories with a focus on ELT in Japan.

The book opens with an analysis of the performance of space at Yasukuni Shinto Shrine, which continues to promote an anachronistic veneration of the war. After identifying the centrality of performance in long-standing dominant narratives, *Transgenerational Remembrance* offers close readings of artistic performances that tackle subject matter largely obscured before 1989: the kamikaze pilot, Japanese imperialism, comfort women, the Battle of Okinawa, and Japanese American internment. These case studies range from Hirata Oriza's play series about Japanese colonial settlers in Korea and Shimada Yoshiko's durational performance about comfort women to Kondo Aisuke's videos and gallery installations about Japanese American internment.

The guidance in *Designing Streets for Kids* captures international best practices, strategies, programs, and policies that cities around the world have used to design streets and public spaces that are safe and appealing to children from their earliest days. The guidance also highlights tactics for engaging children in the design process, an often-overlooked approach that can dramatically transform how streets are designed and used.

**Foretelling the End of Capitalism: Intellectual Misadventures since Karl Marx**

Boldizzoni, Francesco

(Harvard U.P.)

2020 : 05 336 p. Hardback 9780674919327 US\$35.00

Prophecies about the end of capitalism are as old as capitalism itself. None have come true. Yet, whether out of hope or fear, we keep looking for harbingers of doom. In *Foretelling the End of Capitalism*, Francesco Boldizzoni gets to the root of the human need to imagine a different and better world and offers a compelling solution to the puzzle of why capitalism has been able to survive so many shocks and setbacks. Capitalism entered the twenty-first century triumphant, its communist rival consigned to the past. But the Great Recession and worsening inequality have undermined faith in its stability and revived questions about its long-term prospects. Is capitalism on its way out? If so, what might replace it? And if it does endure, how will it cope with future social and environmental crises and the inevitable costs of creative destruction? Boldizzoni shows that these and other questions have stood at the heart of much analysis and speculation from the early socialists and Karl Marx to the Occupy Movement. Capitalism has survived predictions of its demise not, as many think, because of its economic efficiency or any intrinsic virtues of markets but because it is ingrained in the hierarchical and individualistic structure of modern Western societies.

### Raising Keynes: A Twenty-First-Century General Theory

Marglin, Stephen A.

(Harvard U.P.)

2020 : 07 720 p. Hardback 9780674971028 US\$59.95

John Maynard Keynes's *General Theory of Employment, Interest, and Money* was the most influential economic idea of the twentieth century. But, argues Stephen Marglin, its radical implications were obscured by Keynes's lack of the mathematical tools necessary to argue convincingly that the problem was the market itself, as distinct from myriad sources of friction around its margins. Marglin fills in the theoretical gaps, revealing the deeper meaning of the *General Theory*. Drawing on eight decades of discussion and debate since the *General Theory* was published, as well as on his own research, Marglin substantiates Keynes's intuition that there is no mechanism within a capitalist economy that ensures full employment. Even if deregulating the economy could make it more like the textbook ideal of perfect competition, this would not address the problem that Keynes identified: the potential inadequacy of aggregate demand.

### The Wolf at the Door: The Menace of Economic Insecurity and How to Fight It

Graetz, Michael J. & Shapiro, Ian

(Harvard U.P.)

2020 : 02 368 p. Hardback 9780674980884 US\$29.95

Michael Graetz and Ian Shapiro focus on what really worries people: not what the rich are making but rather their own insecurity and that of people close to them. Americans are concerned about losing what they have, whether jobs, status, or safe communities. They fear the wolf at the door. The solution is not protectionism or class warfare but a return to the hard work of building coalitions around realistic goals and pursuing them doggedly through the political system. This, Graetz and Shapiro explain, is how earlier reformers achieved meaningful changes, from the abolition of the slave trade to civil rights legislation. The authors make substantial recommendations for increasing jobs, improving wages, protecting families suffering from unemployment, and providing better health insurance and child care, and they guide us through the strategies needed to enact change.

**The Great American Housing Bubble: What Went Wrong and How We Can Protect Ourselves in the Future**

Levitin, Adam J & Wachter, Susan M

(Harvard U.P.)

2020 : 06 352 p. Hardback 9780674979659 US\$45.00

The American housing bubble of the 2000s caused the worst global financial crisis since the Great Depression. In this definitive account, Adam Levitin and Susan Wachter pinpoint its source: the shift in mortgage financing from securitization by Fannie Mae and Freddie Mac to "private-label securitization" by Wall Street banks. This change set off a race to the bottom in mortgage underwriting standards, as banks competed in laxity to gain market share. *The Great American Housing Bubble* tells the story of the transformation of mortgage lending from a dysfunctional, local affair, featuring short-term, interest-only "bullet" loans, to a robust, national market based around the thirty-year fixed-rate mortgage, a uniquely American innovation that served as the foundation for the middle class.

*Nissan Institute/Routledge Japanese Studies* (Routledge)

2020 : 02 352 p. Hardback 9780367341053 £120.00

Contrary to the dominant argument, which holds outmigration and demographic hyper-aging as primarily responsible for rural decline, this book highlights the spatial dimension of power differences behind uneven development in contemporary Japan. Including many fieldwork-based case studies, the chapters discuss topics such as corporate farming, local energy systems and public healthcare, examining the constraints and possibilities of rural self-determination under the centripetal impact of forces located both in and outside of the country. Focusing on asymmetries of power to explore regional autonomy and heteronomy, it also examines "peripheralization" and the "global countryside," two recent theoretical contributions to the field, as a common framework.

*Urban Migrants in Rural Japan* provides a fresh perspective on theoretical notions of rurality and emerging modes of working and living in post-growth Japan. By exploring narratives and trajectories of individuals who relocate from urban to rural areas and seek new modes of working and living, this multisited ethnography reveals the changing role of rurality, from postwar notions of a stagnant backwater to contemporary sites of experimentation. The individual cases presented in the book vividly illustrate changing lifestyles and perceptions of work.

Against those who hold that rights are static and immutable, Schulz and Raman argue that rights must adapt to new realities or risk being consigned to irrelevance. To preserve and promote the good society - one that protects its members' dignity and fosters an environment in which people will want to live - we must at times rethink the meanings of familiar rights and consider the introduction of entirely new rights.

Across the world, democracies are suffering from a disconnect between the people and political elites. In communities where jobs and industry are scarce, many feel the government is incapable of understanding their needs or addressing their problems. The resulting frustration has fueled the success of destabilizing demagogues. To reverse this pattern and restore responsible government, we need to reinvigorate democracy at the local level. But what does that mean? Drawing on examples of successful community building in cities large and small, from a shrinking village in rural Austria to a neglected section of San Diego, *Reconstructing Democracy* makes a powerful case for re-engaging citizens. It highlights innovative grassroots projects and shows how local activists can form alliances and discover their own power to solve problems.

After tracing the Electoral College's tangled origins at the Constitutional Convention, Keyssar explores the efforts from 1800 to 2019 to abolish or significantly reform it, showing why each has thus far failed. Reasons include the tendency of political parties to elevate partisan advantage above democratic values, the difficulty of passing constitutional amendments, and, especially, the impulse to preserve white supremacy in the South, which led to the region's prolonged backing of the Electoral College. The most common explanation - that small states have blocked reform for fear of losing influence - has only occasionally been true.

(State U. of New York)

In this comprehensive overview of Friedrich Engels's writings, Paul Blackledge critically explores Engels's contributions to modern social and political theory generally and Marxism specifically. Through a careful examination both of Engels's role in the forging of Marxism in the 1840s, and his contributions to the further deepening and expansion of this worldview over the next half century, Blackledge offers a closely argued and balanced assessment of his thought. This book challenges the long-standing attempt among academic Marxologists to denigrate Engels as Marx's greatest mistake, and concludes that Engels was a profound thinker whose ideas continue to resonate to this day.

Cage, Julia / Camiller, Patrick (trans.)

(Harvard U.P.)

One person, one vote. In theory, everyone in a democracy has equal power to decide elections. But it's hardly news that, in reality, political outcomes are heavily determined by the logic of one dollar, one vote. We take the political power of money for granted. But does it have to be this way? In *The Price of Democracy*, Julia Cagé combines economic and historical analysis with political theory to show how profoundly our systems in North America and Europe, from think tanks and the media to election campaigns, are shaped by money. She proposes fundamental reforms to bring democracy back into line with its egalitarian promise.

### Japanese Democracy and Lessons for the United States: Eight Counterintuitive Lessons

Christensen, Ray

*Politics in Asia* (Routledge)

2020 : 03 210 p. Hardback 9780367440053 £120.00

Featuring extensive data and evidence from both Japan and the United States, the themes covered include one-party rule, ballot security and voting procedures, election regulations, malapportionment and gerrymandering, court interventions, voter attachments, and distortions of the public will by election rules. In so doing, the analysis challenges conventional wisdom in both Japan and the United States, highlighting surprising and counterintuitive findings from decades of observation. This book also explicitly compares Japan to other, similarly situated democracies. Japan is therefore not treated as a standalone case but, rather, the lessons from Japan are contextualized for greater understanding and can be used to inform discussions about comparative elections and democracy.

Murashkin, Nikolay

*Nissan Institute/Routledge Japanese Studies* (Routledge)

Featuring interviews with decision-makers and experts from Japan, China, Kazakhstan, Uzbekistan, Azerbaijan, and the Philippines, this book argues that Japan's impact on Central Asia and its connectivity has been underappreciated. It demonstrates that Japan's infrastructural footprint in the New Silk Road significantly pre-dated China's Belt and Road Initiative, and that the financial and policy contribution driven by Japanese officials was of a similar order of magnitude. It also goes on to show that Japan was the first major power outside of post-Soviet Central Asia to articulate a dedicated Silk Road diplomacy vis-à-vis the region before the United States and China, and the first to sponsor pivotal assistance.

2019 : 12 206 p. Hardback 9780367340940 £120.00 Paperback 9780367344849 £34.99

Set within the historical context of the 1991 Hague Declaration and Action Plan of 2001, this book analyses the impact of recent background changes to the liberal trading order, the proliferation of free trade agreements, and uncertainty about role of the United States in the world on relations between Japan and the EU. Adopting a path-dependent approach, it illustrates how these agreements were reached as a result of growing patterns of cooperative behaviour between the EU and Japan, and the imprint of shared past experiences in areas from trade to security. In so doing, this book also raises important questions about the future of multilateral cooperation, exploring the potential for bilateral agreements to undermine the possibility of finding international solutions to increasingly international problems.

*In the Ruins of the Japanese Empire* concludes that early East Asian Cold War history needs to be studied within the framework of post-imperial history. Japan's surrender did not mean that the Japanese and former imperial subjects would immediately disavow imperial ideology. The end of the Japanese empire unleashed unprecedented destruction and violence on the periphery. Lives were destroyed; names of cities altered; collaborationist regimes - which for over a decade dominated vast populations - melted into the air as policeman, bureaucrats, soldiers, and technocrats offered their services as nationalists, revolutionaries or communists. Power did not simply change hands swiftly and smoothly. In the chaos of the new order, legal anarchy, revenge, ethnic displacement, and nationalist resentments stalked the postcolonial lands of northeast Asia, intensifying bloody civil wars in societies radicalized by total war, militarization, and mass mobilization.

For the first century and a half of its existence, the United States had just one alliance - a valuable but highly controversial military arrangement with France. Largely out of deference to George Washington's warnings against the dangers of "entangling alliances," subsequent American presidents did not consider entering another alliance for 150 years. Then everything suddenly changed. Between 1948 and 1955, US leaders extended defensive security guarantees to twenty-three countries in Europe and Asia. Seventy years later, the United States had allied with thirty-seven. In *Shields of the Republic*, Mira Rapp-Hooper stresses the remarkable success of these alliances.

This volume examines the royal transition in Thailand, from the 2014 coup through the 2019 election. The royal transition sparked a crisis that jeopardised the Thai nation and its institutions, from the politicised judiciary to the troubled Sangha or priesthood. The period of waiting has influenced all aspects of Thai governance, from foreign policy to economic management, with a new constitution put in place in 2017, to the troubled human rights situation and spread of self-censorship. This volume, which brings together some of the leading writers on Thailand, is the first book-length analysis of this deep transition.

It considers the idea of Confucius and Taoism and studies the practice of minna, characterising it as a cooperative and peaceful problem-solving method. Addressing the trend of 'learnification' and its contribution to educational reform, it explores the impacts, conflicts and difficulties of introducing learner-centred education into East Asian educational settings as well as the potential of Manabi as an effective tool for all types of learning.

Raymond Geuss begins by making a general case for flexible and skeptical thinking with room for doubt and unresolved complexity. He examines the ideas of two of his most influential teachers - one systematic, the other pragmatic - in light of Nietzsche's ideas about appearance and reality. The chapters that follow concern related moral, psychological, and philosophical subjects. These include the idea that one should make one's life a work of art, the importance of games, the concept of need, and the nature of manifestos. Along the way, Geuss ranges widely, from ancient philosophy to modern art, with his characteristic combination of clarity, acuity, and wit.

Loughnane, Adam

(State U. of New York)

2019 : 12 352 p. Hardback 9781438476117 US\$95.00

In *Merleau-Ponty and Nishida*, Adam Loughnane initiates a fascinating new dialogue between two of the twentieth century's most important phenomenologists of the Eastern and Western philosophical worlds. Throughout the book, the reader is guided among the intricacies and innovations of Merleau-Ponty's and Nishida's ontological approaches to artistic expression with a focused look at a rarely explored connection between faith and negation in their philosophies. Exploring the intertwining of these concepts in their broader ontologies invokes a reappraisal of the ambiguous status of religion and art in the writings of both thinkers. Measuring these ambiguities, the ontologies of Flesh and Basho are read in-depth alongside great artworks and the motor-perceptual practices of seminal landscape artists such as Cézanne, Sesshū, Taiga, and Hasegawa, as well as other major figures of European, Chinese, and Japanese art history.

Dobbins, James C.

(Univ. of Hawaii Pr.)

Images of the Buddha are everywhere—not just in temples but also in museums and homes and online—but what these images mean largely depends on the background and circumstance of those viewing them. In *Behold the Buddha*, James Dobbins invites readers to imagine how premodern Japanese Buddhists understood and experienced icons in temple settings long before the advent of museums and the internet. Although widely portrayed in the last century as visual emblems of great religious truths or as exquisite works of Asian art, Buddhist images were traditionally treated as the very embodiment of the Buddha, his palpable presence among people. Hence, Buddhists approached them as living entities in their own right - that is, as awakened icons with whom they could interact religiously.

Over its long history, Buddhism has never been a simple monolithic phenomenon, but rather a complex living tradition - or better, a family of traditions - continually shaped by and shaping a vast array of social, economic, political, literary, and aesthetic contexts across East Asia, South Asia, and Southeast Asia. Written by undergraduate educators, *Buddhisms in Asia* offers a guide to Buddhism's rich variety of traditions and cultural expressions for educators who would like to include Buddhism in their undergraduate courses. It introduces fundamental yet often underrepresented Buddhist texts, concepts, and material in their historical contexts; presents the major "ecologies" of Buddhist belief, practice, and cultural expression; and provides methodological insights regarding how best to infuse Buddhist content into undergraduate courses in the humanities and social sciences. The text aims to represent "Buddhisms" by approaching the subject from a broad range of disciplinary perspectives, including art history, anthropology, history, literature, philosophy, religious studies, and pedagogy.

前著『国民の天皇』の改訂増補版

Ruoff begins by examining the reform of the monarchy during the U.S. occupation and then turns to its evolution since the Japanese regained the power to shape it. To understand the monarchy's function in contemporary Japan, the author analyzes issues such as the role of individual emperors in shaping the institution, the intersection of the monarchy with politics, the emperor's and the nation's responsibility for the war, nationalistic movements in support of the monarchy, and the remaking of the once-sacrosanct throne into a "people's imperial house" embedded in the postwar culture of democracy. Finally, Ruoff examines recent developments, including the abdication of Emperor Akihito and the heir crisis, which have brought to the forefront the fragility of the imperial line under the current legal system, leading to calls for reform.

In *Wings for the Rising Sun*, scholar and former airline pilot Jürgen Melzer connects the intense drama of flight with a global history of international cooperation, competition, and conflict. He details how Japanese strategists, diplomats, and industrialists skillfully exploited a series of major geopolitical changes to expand Japanese airpower and develop a domestic aviation industry. At the same time, the military and media orchestrated air shows, transcontinental goodwill flights, and press campaigns to stir popular interest in the national aviation project. Melzer analyzes the French, British, German, and American influence on Japan's aviation, revealing in unprecedented detail how Japanese aeronautical experts absorbed foreign technologies at breathtaking speed. Yet they also designed and built boldly original flying machines that, in many respects, surpassed those of their mentors.

*The Trucial Coast Diaries* are the secret reports written in Dubai by the Representatives of the London based group of oil companies, the Iraq Petroleum Company, known on the Trucial Coast as Petroleum Development (Trucial Coast), PD(TC). These men, the authors, were in a unique position to observe the social, economic and political environment of the people then living in the present day United Arab Emirates, before oil revenues led to a dramatic transformation from intense poverty to the great wealth which now permeates every aspect of this society. The diaries, dating from 1948 to 1957, are reproduced here with extensive footnotes added on each page to provide explanation and clarification for readers who may not be familiar with the people, the places and the way of life a long time ago 'on the Coast'.

Bringing together the latest scholarship from all over the world on topics ranging from reading practices in ancient China to the workings of the twenty-first-century reading brain, the 4 volumes of the Edinburgh History of Reading demonstrate that reading is a deeply imbricated, socio-political practice, at once personal and public, defiant and obedient. It is often materially ephemeral, but it can also be emotionally and intellectually enduring.

Early Readers presents a number of innovative ways through which we might capture or infer traces of readers in cultures where most evidence has been lost. It begins by investigating what a close analysis of extant texts from 6th-century BCE China can tell us about contemporary reading practices, explores the reading of medieval European women and their male medical practitioner counterparts, traces readers across New Spain, Peru, the Ottoman Empire and the Iberian world between 1500 and 1800, and ends with an analysis of the surprisingly enduring practice of reading aloud.

**The Complete History of the Black Death**

Benedictow, Ole J.

(Boydell & Brewer)

2020 : 09 1200 p. Hardback 9781783275168 £125.00

The Black Death was a disaster of huge magnitude, shaking medieval Europe and beyond to its economic and social core. Building upon his acclaimed study of 2004, Ole Benedictow here draws upon new scholarship and research to present a comprehensive, definitive account of the Black Death and its impact on European history. The medical and epidemiological characteristics of the disease, its geographical origin, its spread across Asia Minor, the Middle East, North Africa, Europe and Russia, and the mortality in the countries and regions for which there are satisfactory studies, are clearly presented and thoroughly discussed. The pattern, pace and seasonality of the spread of the disease reflect current medical work and standard studies on the epidemiology of bubonic plague. Benedictow's findings make it clear that the true mortality rate was far higher than had been previously thought: some 60% of Europe's population. In the light of those findings, the discussion of the Black Death as a turning point in history takes on a new significance.
